

## Professional Summary

---

I am a highly skilled and creative graphic designer, brand identity designer, web designer, and web developer with over 5 years of experience in the industry. I have a passion for designing and developing visually appealing and user-friendly websites, creating unique brand identities, and delivering excellent graphic design solutions for clients. Currently, I am a year 4 student at the University of Bamenda, working on my industrial attachment second-semester course, which is my internship as a full-stack developer at CivilSalt, where we build websites and web applications using C# and Visual Studio. I have also worked as a graphic designer with several companies, including Kuja EcoPads, Legacy Housing and Real Estate CMR, Tera Tech Ltd, and currently, I am the CEO of Albany.co, which provides design and print services for my Cameroonian clients. I am also available on freelance websites like Fiverr, Upwork, where I get to work with international clients. Furthermore, I run over 6 online print on demand product shops with amazing designs, and I am partly into marketing as I run my own marketing campaigns and SEO optimizations fairly well.
